

I wanted to comment on K-LOVE radio station's service to my local community. K-LOVE provides a positive, family oriented listening environment for my community. They provide up-to-date local information on Christian events that are not found on any other local radio station.

If K-LOVE were displaced from our community, there are no other radio stations that play they type of positive and encouraging music that they play. It would effect the local Christian community in a detrimental way, because there are no replacement radio stations.

The service that K-LOVE provides is in the public interest because of the positive family environment that they provide on their station. There are so few radio stations left that you would allow your children to listen to, K-LOVE is one of those few remaining radio stations that you wouldn't think twice about letting kids listen to.
